**LETTER OF RECOMMENDATION – LINDA WEST**

Linda has worked under my supervision as manager of web and publications since March 12, 2001. Her assignment was to upgrade our complete image in our online and print publications. She created our web site from the ground up and was responsible for producing the template for our e-newsletter and all paper publications. Linda succeeded in her assignment beyond my original expectations.

Even though the project is complete, as a result of our high level of satisfaction, I've asked Linda to stay on at a part time basis to the Club to maintain changes on the site, and to do our Symposium Programs. Since I can no longer offer her the full hours she needs, I highly recommend Linda to anyone seeking to employ a strongly motivated and productive person.

Linda did an outstanding job for us in:

- Improving our image
- Getting our Web site completed and operational on a small budget. The web site has features that many other companies would have paid much more for!
- Upgrading all of our print material

From a business standpoint, Linda did an excellent job in seeking out solutions for our projects. These decisions included the ISP to host the site, the printer we use and a technology repair service. In all of these projects, Linda helped us save money while we got high quality work.

Working with Linda is rewarding. She works well independently as well as side-by-side with her co-workers or me when circumstances warrant it. Linda is able to accept criticism, both positive and negative. Deadlines are met even when they require flexibility on her part. One of Linda's biggest strengths is that she is a strong team player. She is always willing to help others. I am impressed with her efficiency, integrity, flexibility and creativity.

I anticipate a continued and mutually gratifying work relationship with Linda. As mentioned above, we do require her services for web site maintenance and producing our event collateral.

In closing, as detailed above, based on my experience working with her, I can unreservedly recommend Linda West to any prospective employer. If you would like further elaboration, feel free to call me at (847) 837-3900 or email me at [ajarett@technologyexecutivesclub.com](mailto:ajarett@technologyexecutivesclub.com).

Sincerely,

Alex Jarett, President
